Food Engine

Complete Restaurant Solution

FoodEngine is a fully integrated digital food operations platform designed to streamline end-to-end restaurant and kitchen/factory management. Our software seamlessly connects Billing POS, Dine-in, Takeaway, Online orders, Delivery channels, and WhatsApp Integration into one unified system. It automatically links every order to kitchen production, standardized recipes, and real-time inventory, ensuring accurate stock deduction and controlled raw material usage. With seamless integrations for payment gateways, online aggregators and third-party delivery platforms, it ensures smooth coordination between front-end order processing and back-end kitchen, production, and inventory operations.

HotelDesk
Hotel Management Solution

HotelDesk is a cloud-based property management software designed to streamline complete hotel operations from a single platform. Our software manages front office, reservations, billing, housekeeping and inventory, spa, gym, party halls, and other revenue outlets in real time. It integrates seamlessly with In-house restaurants POS and third-party applications. It also includes a Channel Manager, Booking Engine, and website creation support to drive direct bookings and manage online distribution effectively, along with Pocket PMS, our mobile-friendly solution that enables owners and managers to monitor operations anytime, anywhere bringing all departments together into one connected system.

About CIARSS:

Founded in 2014, with the basic premise that CUSTOMER IS ALWAYS RIGHT, our vision is to make the food & hospitality industry technology-enabled and help them achieve their highest operational efficiency and hence, increase their revenues. Our ERP products are FoodEngine (Complete Restaurant Solution) and HotelDesk (Hotel Management Solution).

With more than 1000 installations across India & abroad, CIARSS has become a trusted brand in the food & hospitality industry. We understand the challenges of our hotel and restaurant clients like the back of the hand and offer a range of features in this domain. Our range of expertise in the food & hospitality industry and speed of execution has helped clients migrate from legacy systems to complete online businesses in a short time. With a well-designed delivery mechanism and hand-holding systems, we ensure that the migration and support are just seamless.

Our full-fledged team of industry/domain experts, designers, developers, sales, implementers and digital marketers help you to implement the best-in-class solutions, right from handling your operations to managing your inventory and from capturing customers' orders/bookings online to managing your digital presence. Our solutions are designed to handle your day-to-day operations so that you can simply focus on your business growth and leave the technology to us.
